How does the IAEA help prevent the spread of nuclear weapons?

IAEA inspectors verify that countries use nuclear material and technology for peaceful purposes

They carry out this work by applying technical measures known as safeguards

States accept these measures by concluding safeguards agreements with the IAEA

In 2016, the IAEA applied safeguards agreements in 181 States

Inspectors collected 1077 samples to check and detect any nuclear material

Particle analysis - a powerful verification tool - provides information on past and current nuclear activities

IAEA safeguards are an essential component of the international security system
